Font Choices

- Select fonts that are clear and legible. Sans-serif fonts like Arial or Helvetica are often preferred for digital presentations.
- Limit the number of different fonts used to maintain consistency and avoid distraction.

Readability Tips

- Ensure sufficient contrast between text and background for better visibility.
- Use larger font sizes for headings and key points to make them stand out.
- Avoid using all caps, as it can be harder to read and may appear as shouting.

Using Images and Graphics Effectively
